

**Amendments to the Specification:**

Please replace paragraph [0043] with the following amended paragraph:

**[0043]** The internal design of an MPU 1 is illustrated in Fig. 3. Being essentially a wireless PDA, unit 1 incorporates touchscreen LCD 3, antenna 4, LED 8, connector 7, control buttons 6, a programmable microprocessor 18, such as a DRAGON-BALL ~~Dragon-Ball-Z~~<sup>®</sup> microprocessor, a spread-spectrum RF transceiver 19, such as a BLUE TOOTH ~~BlueTooth~~<sup>®</sup> transceiver and a speaker 20. Also incorporated within the internal design of an MPU 1, but not shown explicitly in Fig. 3, are conventional dynamic and non-volatile memory and a rechargeable battery.

Please replace paragraph [0067] with the following amended paragraph:

**[0067]** Although connectors 7 and 23 are described as the primary LAN 22 channel for downloading to MPU 1 by UDK 2, their communication function can also be carried out by infrared communication ports built into MPU 1 and UDK 2 as is illustrated in FIG. 18. As shown in FIGS. 18 (a) and 18 (b) respectively, MPU 1 is equipped with infrared (IrDa) communications port 135, while LAN 22 is equipped with a matching IrDa port 137. Note that although infrared ports 135 and 137 are more expensive than connectors 7 and 23, the former do not require a precise alignment of the communicating devices and, therefore, are frequently utilized in PDAs for the purposes of communicating with downloading stations. Ports 135 and 137 allow UDK 2 to download MPU 1 through ~~two-way~~ infrared channel 136. Moreover, a commercial wireless PDA equipped with an infrared port 135 can function as MPU 1, provided it is downloaded by PC 21 not only with encryption key 82 and/or bingo pack 43 but also with the above-described executable program for playing casino games and such downloading is performed via an infrared communication port. Note that techniques of downloading executable files from a stationary device into a portable device are well known and not explained herein. Therefore, an opportunity for a player to bring to the casino a favorite PDA and use it as a personal slot machine may be very attractive for some casinos because it decreases the cost of owning and maintaining the rental fleet of MPU 1 devices.
